With a scavenging engine this trouble is avoided. 1903 *Amer. Inventor* 15 Aug. 78 (Cent. D, Suppl.) In all engines employing the two-stroke cycle, scavenging must be accomplished either by special piston movement or by a blast of air from an auxiliary pump, directed in such a manner as to force out the remaining burned gases. .. The engine under description scavenges thoroughly and completely upon the return stroke of the pistons, which then draw in their charge of explosive mixture, undiluted either by products of combustion or by scavenging air. 1924 *Times Trade & Engin. Suppl.* 29 Nov. 250/3 As is usual with large Sulzer engines the scavenging air is supplied from electrically driven turbo blowers installed in the engine-room. 1925 *Glasgow Herald* 1 Apr. 7 This new type of engine, with its straight through scavenge and absence of air and exhaust valves.

V* c. 71 § 4 This Act may be cited as the *Sex Disqualification (Removal) Act, 1919. 1921 *Daily Mail Year Bk.* 42/1 The organization of the League of Nations has from the outset been founded on the principle of *sex equality.

b. In many modern scientific terms relating to the origin, transmission, and functions of **sex**: **sex-chromosome**, a chromosome which transmits sex; **sex-control**, the control or modification of inherited characteristics by the sex of the inheritor; hence **sex-controlled** *a.*; **sex-determination**, the determination or influences which decide the sex of an individual; hence **sex-determiner**, that which determines sex; **sex-determining** *ppl. a.*; **sex-factor, -gene**, the factor or gene responsible for sex; **sex-intergrade**, an individual having characteristics of both sexes; **sex-limitation**, the limitation of certain characteristics to one sex; the occurrence of certain characteristics in one sex only; hence **sex-limited** *ppl. a.*, limited to one sex; **sex-linkage**, the state or condition of being sex-linked; **sex-linked** *a.*, denoting a character which is dependent on sex, so that it is dominant only in one or the other sex; also, denoting an individual possessing such a character; **sex ratio**, the ratio between the sexes under given circumstances; **sex-reversal**, a change in the sex of an organism.

1924 J. A. Thomson *Science Old & New* xxxii. 177 But our immediate point is simply that the *sex-antithesis may be but a special case of a still more widespread dichotomy. *Ibid.* xxiii. 128 The voice, primarily a *sex-call, becomes an instrument of reasonable discourse or a medium of purely aesthetic emotion. *Ibid.* xlii. 243 The suppression of the *sex-cell-bearing (gametophyte) generation. 1915 *Nature* 22 Apr. 197/1 Many facts point to the conclusion that a sex-determining factor sometimes resides in special *sex chromosomes. 1924 J. A. Thomson *Science Old & New* xxxii. 177 There are many indirect confirmations of this physiological theory of sex, which is not inconsistent with the view that the immediate index and trigger-puller of one sex or the other may be found in nuclear peculiarities (sex-chromosomes) in the germ-cells. 1931 E. B. Ford *Mendelism & Evol.* v. 96 This does not in the least mean that the stages in the development of *sex control have been arrived at by discontinuous variation. *Ibid.* 36 These two characters are *sex-controlled, that is to say they can only produce the characters for which they are responsible in the internal environment provided by one of the sexes. 1905 C. J. Bond in *Brit. Med. Jrnl.* 28 Oct. 1094/1 It is to this form of disease and *sex correlation that I wish to draw attention to-day. 1906 *Rep. Brit. XXII. 839 Ziegler's Theory of *Sex Determination. 1909 R. H. Lock *Variation, Heredity, & Evol.* ix. 277 It is not necessarily to be supposed that the above description of the facts of sex-determination will hold good for every kind of organism. 1931 E. B. Ford *Mendelism & Evolution* v. 91 It has been established that sex determination is controlled quantitatively. 1913 W. Bateson *Mendel's Princ. Heredity* 321 Further suppose that N can only be borne by gametes containing a *sex-determiner. 1901 Geddes & Thomson *Evol. Sex* 51 In regard to Rotifers (*Hydatina*), Maupas maintains that temperature is the *sex-determining factor. 1915 *Nature* 22 Apr. 197/1 Many facts point to the conclusion that a sex-determining factor sometimes resides in special sex chromosomes. 1924 J. A. Thomson *Science Old & New* xxxii. 177 The *sex-divergence is primarily an illustration of a more wide-spread organismal dichotomy. *Ibid.* xv. 82 An expression and an evocation of *sex-excitement. 1919 R. C. Punnett *Mendelism* (ed. 5) 100 It is necessary to suppose that the male *Drosophila* is always heterozygous both for the *sex-factor and for the factor for red-eye. 1931 E. B. Ford *Mendelism & Evol.* i. 24 Sex is dependent upon genetic factors carried in a particular pair of chromosomes. They have a quantitative action; one dose of the sex factors producing one sex and two doses the other. 1930 R. A. Fisher *Genet. Theory Nat. Selection* vii. 164 In fishes it appears that we ought more properly to speak of the *sex-gene rather than the sex-chromosome as the agent of sex determination. 1919 R. C. Punnett *Mendelism* (ed. 5) 100 They have been able to correlate these peculiar differences in *sex-heredity with differences in the minute structure of the cells of which the bodies of the two sexes are composed. 1924 J. A. Thomson *Science Old & New* xxi. 114 The occurrence of '*sex-intergrades', such as very masculine females, is well known among pigeons. 1919 *Daily Mail Year Bk.* 10/1 The mysteries of life, and especially of *sex-life, should be unfolded to young people wholesomely, but clearly. 1924 J. A. Thomson *Science Old & New* xxii. 125 Disturbances in the sex-life are often registered in abnormalities of the antlers. 1913 W. Bateson *Mendel's Princ. Heredity* 229 Dr. C. J. Bond..calls attention to evidence suggesting *sex-limitation in certain deaf-mute families, sometimes the male, sometimes the female being the affected sex. 1909 *Darwin & Mod. Science* (ed. A. C. Seward) v. 94 A study of the *sex-limited descent of certain features in other animals. 1919 R. C. Assoc.* 419 Two other traits appear ..as *sex-linked characters. They are transmitted through mothers to some or all of their sons. 1930 R. A. Fisher *Genet. Theory Nat. Selection* iii. 65 Since the factor is sex-linked, dominance can only appear in the female. 1908 J. A. Thomson *Heredity* xiii. 505 The particular *sex-ratio now general has been long established. 1930 G. R. de Beer *Embryol. & Evol.* iii. 22 A series of degrees of intersexality can be established from very slight to complete *sex-reversal.

Instead of a wide court the tenants of the north side will find this morning a solid iron railing eight feet high and ninety feet long. 1928 *Hearst's International* Aug. 89/2 For the full depth of the boundary ran a tall fence of unpainted boards set upright. This fence was fully eighteen feet high. It was what is known as a spite-fence.

Spitter[2]. Add: 3. *Baseball.* A spit-ball.

1924 WEBSTER Addenda. 1928 G. H. RUTH *Baseball* vi. 75 The theory of the spitter is simple enough. The ball is wet on one side. Naturally that makes a slippery spot which reduces friction and gives added speed to the opposite side where friction is applied.

f. Pieces of the lead of a bullet melted by the force of impact on a metal plate (see quot.).

1931 MARTEL *In Wake of Tank* 45–6 The question of 'splash' was one which caused us much trouble and necessitated experimental work. When a bullet hits a steel plate, the heat generated fuses the lead and this squirts along the armour plate and enters the tank at any crevices that exist, such as the clearance between a revolving turret and the walls of the tank. This lead enters the tank as a bright flash, and is known as splash. It is curious that the Germans never realised the effect of splash on our crews.
